

Please join us for an evening with FAASafety Team Representative,
Michael Lessard and your Air Traffic Controllers from Bangor
Approach

“COMMUNICATIONS”

Perhaps no other essential activity in aircraft operations is as vulnerable to failure through human error and performance limitations as spoken communication.

And few tasks of pilots increase the risks of mid-air collisions, near misses and runway incursions than poor communications. Learn that communications goes far beyond speaking and listening, and how you can be more effective in your responsibility as Pilot-in-Command. Did you know that good communications skills can be even more important at non-towered fields than in busy terminal areas?

Come in and meet some of the Air Traffic Controllers from Bangor Approach, and share your questions and ideas in this exciting and interactive discussion.

As always, pre-registration on SPANS is appreciated!

This event will be co-sponsored by the Portland ME FSDO, North Atlantic Aviation LLC, and the University Flying Club. There will be lots of great homemade refreshments, door prizes and socializing! So come out and be part of this fun and interesting evening!

**Wednesday, 24 October, 7:00 pm at the Donald P. Corbett Building →
Room 107 → University of Maine → Orono**

Please visit: www.northatlanticaviation.com www.faasafety.gov

For further information and notification on more FAASafety Team Seminars, and many other interesting aviation topics, please be sure to register with the SPANS at www.faasafety.gov.
